9. ☐ Other _____.

Reasons for Allowance

1. Claims 1-19 are allowed as the prior art does not teach or suggest the applicant's invention. Independent claim 1 teaches a method. The distinguishing elements of the claim are detecting a first peak of a PES of a write head; detecting a second peak of the PES of the write head, the second peak following the first peak and being of opposite sign with respect to the first peak; and comparing a distance between the first and second peaks with a distance threshold.

Independent claim 7 teaches a method for controlling operations of a storage device. The distinguishing elements of the claim are detecting a PES of a head of the storage device, the position error signal having at least two consecutive peaks of opposite sign; comparing a distance between the two consecutive peaks to the distance threshold; delaying a write operation if the distance between the two consecutive peaks is greater than the distance threshold.

Independent claim 11 teaches a storage system. The distinguishing element of the claim is wherein if the PES includes two peaks outside a position error threshold, a write operation is halted.

Independent claim 16 teaches a method. The distinguishing element of the claim is resetting a settling algorithm if the PES detects mechanical oscillations of the head outside a predetermined PES threshold.

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mitchell R Slavitt whose telephone number is (703) 305-2809. The examiner can normally be reached on M-F (6:30-4:00), 2nd Friday off.
